

Employee Data Analysis using Excel

STUDENT NAME : G. CHANDRU

REGISTER NO: 312205687

DEPARTMENT : COMMERCE

COLLEGE : MEENAKSHI AMMAL ARTS AND SCIENCE COLLEGE

PROJECT TITLE

Employee Performance Analysis using Excel

AGENDA

1. Problem Statement
2. Project Overview
3. End Users
4. Our Solution and Proposition
5. Dataset Description
6. Modelling Approach
7. Results and Discussion
8. Conclusion

PROBLEM STATEMENT

A problem statement is a brief description of a problem or issue that needs to be addressed. It can be used in business proposals, research proposals, and executive summaries. A problem statement can help ensure that everyone working on a project is aware of the issue and why it's

PROJECT OVERVIEW

- .

A project overview is a concise document that summarizes the key details of a project, including its goals, timeline, budget, and resources. It's a reference for stakeholders and team members that can be used throughout the project.

WHO ARE THE END USERS?

End users are the people who use a product or service, and are often the ones who purchase it. They are also known as end consumers.

End users are different from customers and people involved in the design, development, and production of a product:

OUR SOLUTION AND ITS VALUE PROPOSITION

A value proposition is a statement that explains the benefits of a product or service to a target customer and why it's a better choice than competitors. It's a key part of a company's marketing strategy and should be clear, concise, and easy to understand

Dataset Description

A value proposition is a statement that explains the benefits of a product or service to a target customer and why it's a better choice than competitors. It's a key part of a company's marketing strategy and should be clear, concise, and easy to understand

THE "WOW" IN OUR SOLUTION

A “wow” moment is when a user realizes the unique value of a product or service, and it can lead to a “transformative aha” experience. This can turn casual users into loyal customers, and can lead to benefits like customer loyalty, satisfaction, and word-of-mouth marketing.

MODELLING

Agenda modeling can be used in a variety of contexts, including decision-making, financial modeling, and meeting planning:

Decision-making

Models and scenarios can be used to highlight opportunities or threats, and to synthesize and analyze information. They can also help identify the consequences of actions and policies, and to interpret information about planning, management, and policy.

RESULTS

The results and discussion sections of a research paper are different in that the results section presents the findings of a study, while the discussion section explains the meaning of those findings:

conclusion

This is their way of keeping their viewership/readership high. Level of uncertainty is the second defining condition of need for orientation. Frequently, individuals already have all the reformation that they desire about a topic. Their degree of uncertainty is low. When issues are of high personal relevance and uncertainty low, the need to monitor any changes in those issues will be present and there will be a moderate the need for orientation. If at any point in time viewers/readers have high relevance and high uncertainty about any type of issue/event/election campaign there was a high need for orientation.
